Alvey, your washing equipment solution

Alvey Pot, Pan and Utensil Washing Systems

Model FLC-36

MODEL FLC-36

Front Load Operation - Giant Capacity

The Alvey Model FLC-36 washer is designed for front-loading convenience with a large capacity to accommodate standard delivery carts and up to 36 sheet pans. This efficient stainless steel model is ideal as a high-volume pot, pan and utensil washer. Automatic cycles consists of a recirculated hot water-detergent spray wash, followed by a fresh-water sanitizing rinse. Gas, Electric or Steam heat available.

Model FL-2S

MODEL FL-2S

Front Load Operation

The Alvey Model FL-2S is a 16 pan, automatic front load machine designed to wash pots, pans and cooking utensils. The FL-2S features a wash grate tray and automatic hold-down grid for light weight items with rotating stainless steel spray arms above and below the wash chamber. Gas, Electric or Steam heat available.

Model TT-74

MODEL TT

Turn-Table Operation

The Alvey Model TT is designed to be used as a high capacity batch or continuous style washer. The turn-table design requires only one operator for loading and unloading. The wash cycle consists of a recirculate hot detergent wash followed by a fresh water rinse with the option of a blow off and heated-dryer. Gas, Electric or Steam heat available.

Designed to Fit Nearly any Facility, Large or Small

MODEL SL-2S

Pass-Through Operation

The Alvey Model SL-2S is a compact, 12 pan, pass-through machine designed to be used with load and unload drain tables. The SL-2S features a wash grate tray and automatic hold-down grid for light weight items with rotating stainless steel spray arms above and below the wash chamber. As an option the SL-2S features a third door for front loading or corner installation. Electric or Steam heat available

Note: Shown with optional third door

Model SL-2S

MODEL SL-2D

Two Door Pass-Through Operation

The Alvey Model SL-2D doubles production of the powerful SL-2S. This 24 pan, 2 door, pass-through machine is designed to be used with load and unload drain tables. The SL-2D features a wash grate tray and automatic hold-down grid for light weight items with four rotating stainless steel spray arms above and below the wash chamber. Gas, Electric or Steam heat available

Model SL-2D

MODEL CL-1

Corner Load Operation

The Alvey Model CL-1 is a 12 pan, single door machine with a wraparound design that can be placed in either a right-hand or left-hand corner space. The CL-1 features rotating spray arms with stainless steel nozzles located above and below the 43" diameter wash grate tray. As an option, the CL-1 may be equipped with a gear-driven turntable. The wash and rinse spray pipe assemblies for this option are stationary located at the sides, above, and below the wash chamber. Both piping and nozzles are stainless steel. Gas, Electric or Steam heat available.

Model CL-1

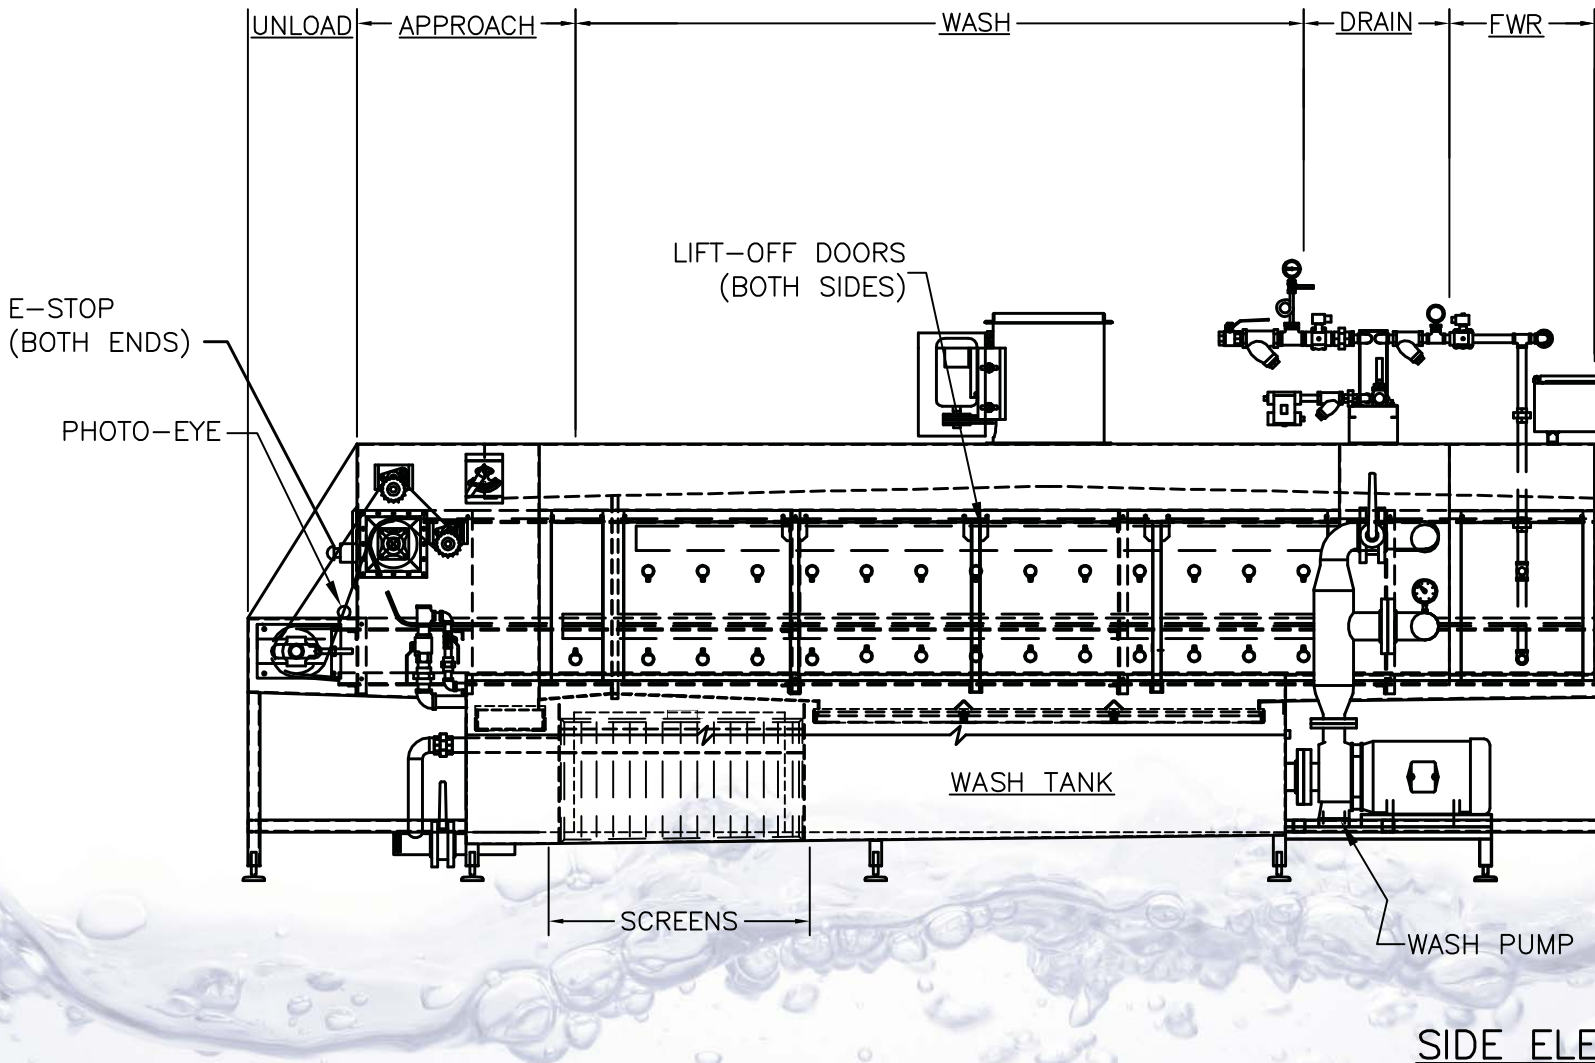

Your Unique Wash, Rinse and Drying Requirements

MODEL CW-101

Conveyorized Pan Washer

The Alvey Conveyorized Pan Washer is designed for high production facilities that require pans, baskets, and utensils to be thoroughly cleaned with little or no pre-sanitizing and scrapping. This machine can be customized to process standard sheet pans at a rate of 200 to 1500 pans per hour. Depending on their size and condition other items may also be processed at a higher or lower rate. Heavy duty construction throughout the machine will provide years of service and dependability. Contact Alvey today to design your customized conveyor washer to meet your production requirements.

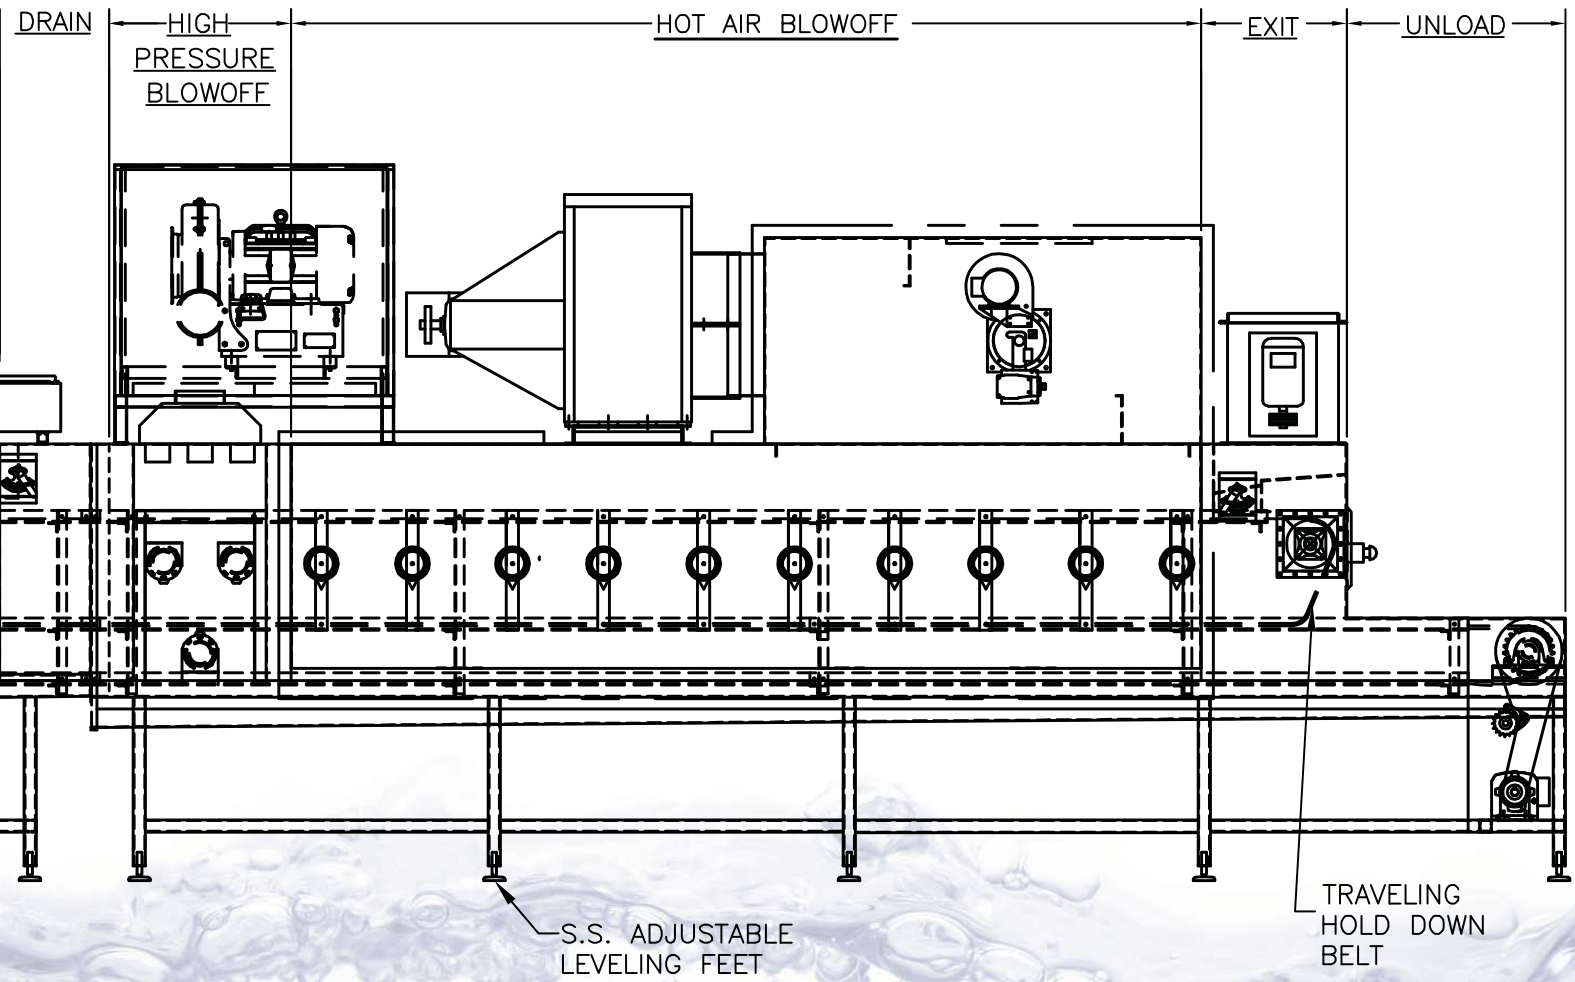

SIDE ELE

Determine the Machine for your Specific Application

Conveyor Design

- High production, continuous conveyor style washers, custom designed for each application
- Fully functioning pre-wired control system
- Variable speed conveyor drive with overload protection
- High volume, high pressure centrifugal pump delivers total spray coverage to the product
- Choose from steam, gas or electric water heating
- Optional high pressure blow-off and heated dryer
- Alvey will work with you to design a machine to fit in your space and meet your production requirements

ELEVATION

Trust Alvey for all your washing needs

MODEL KS-88 and KS-70

Pan Rack Cart & Cabinet Washers

The Alvey Model KS-70 and KS-88 Cabinet Washers are designed to clean racks, carts, and delivery cabinets. The KS series is also an efficient solution for high-volume pot, pan, and utensil washing with the use of optional racks. A second door can be located at the rear of the machine for pass-through operation. The KS Series can be modified to meet almost any rack or production rate.

Cart & Rack Washers

- Roll-in style cart and rack washer
- Adjustable wash and rinse cycles
- High volume, high pressure centrifugal pump delivers total spray coverage to the product
- Door operated safety shutdown switch
- Custom carts available for washing hard to clean items
- Gas, electric and steam heat available
- Floor or Pit mounted available
- Optional Rinse Boosters

Model KS-88 Floor mount installation with optional side-mount tank

Model KS-48

MODEL KS-48

Roll in convenience, superior quality

The Alvey Model KS-48 is designed for high-volume washing in a tight space. This stainless steel cabinet washer features roll in convenience for cleaning racks, carts, pots, pans and utensils. The KS-48 can be floor or pit mounted and optional racks are available.

Each washer is built to order and tested thoroughly

MODEL GI-1 and GI-2 *Receptacle Washers*

The Alvey Can Washer quickly and efficiently washes and sanitizes containers and receptacles in a fully contained stainless steel cabinet. No longer is it necessary to devote a separate room for washing soiled receptacles. The cabinet design allows the operator to simply place the can into the washing chamber, close the door and push the “start” selector switch; the GI does the rest.

GI Series Receptacle and Container Washers

- Prewash, wash and rinse cycles
- Nozzles are positioned to wash the inside and outside of cans
- Washes a variety of waste receptacles
- Compact space-saver design

Model GI-1

Model GI-2

TUFFTANK™

MODEL TUFFTANK™ *Receptacle Washer*

The TUFFTANK™ quickly and efficiently flushes containers and receptacles with your supplied hot water in a fully enclosed stainless steel cylinder. The cabinet design allows the operator to simply place the can into the washing chamber, close the door and push the start button; the TUFFTANK™ does the rest.

The easy-to-use Alvey TUFFTANK™ offers a simple can washing solution that will save time and reduce greenhouse gasses, at an affordable price. Nearly one third of all greenhouse gasses are associated with food waste. Proper separation and removal of food waste can help eliminate this problem.

Alvey, your washing equipment solution

Alvey Washing Equipment has been manufacturing equipment for over 75 years. A Division of Cincinnati Industrial Machinery, Alvey offers a large engineering staff, experienced technicians and over 315,000 square feet of manufacturing space.

Our parent company, Cincinnati Industrial Machinery offers full service manufacturing specializing in the design and installation of high-volume cleaning and preparation machinery, ovens, paint and finishing systems, and other specialty machinery.
